Weight Woofers

Strava, but for your chonky dawg

Every dog can win.

Weight Woofers is a **free walking game** that scores every walk against what **your dog** needs, so a Pug and a Kelpie compete on a level field.

1. **Fair scoring for every dog**
   Points adjust for breed energy, size and age. Leaderboards are split by size, from the Teacup League to the Absolute Unit League.

2. **Built to get you out the door**
   Weekly goals, streaks and a bit of friendly rivalry make the daily walk the best part of the day.

3. **Steady beats extreme**
   Daily points are capped, so overdoing it never wins. Consistency is what gets you to the top.
